

GCP, Docker & Kubernetes Certifications Guide

1. Google Cloud Certifications

Associate Cloud Engineer: Focus on deployment, monitoring, and managing solutions.

Professional Cloud Architect: Design secure, scalable, and reliable architectures.

Professional Data Engineer: Build and manage data processing systems.

2. Docker Certifications

Docker Certified Associate (DCA): Covers containerization, images, networking, and security.

3. Kubernetes Certifications

CKA (Certified Kubernetes Administrator): Cluster management, networking, storage.

CKAD (Certified Kubernetes Application Developer): Application design and deployment.

CKS (Certified Kubernetes Security Specialist): Kubernetes security, policies, hardening.

4. Recommended Learning Path

Step 1: Learn Docker fundamentals.

Step 2: Move to Kubernetes basics.

Step 3: Practice on GCP (GKE).

Step 4: Attempt certifications (ACE → CKA → CKAD → CKS).

5. Career Opportunities

Cloud Engineer, DevOps Engineer, Kubernetes Administrator, Platform Engineer.
